### Canon Eos Manual Focus

When you can't achieve focus, you have no choice but to manually focus the lens. Canon lenses and most third-party lenses give you the option of switching to manual focus. To manually focus the lens, follow these steps: Move the Focus switch to MF. On most lenses, you'll find this switch on the left side when the camera is facing your subject.

A split-image focusing screen helps with manual focus by visually splitting a subject along the horizontal or vertical and horizontal axis when it is not in focus and bringing the image together when the subject is in focus. Canon's Ec-L Cross-Split screen is similar to the Ec-B screen but combines a vertical and horizontal split. With either version, the split-image focusing area occupies the center of the screen, and can be used with lenses that have a maximum effective aperture of f/5.6 ...

I have a Canon EOS t7i Rebel and now all of a sudden, the camera will not auto focus nor will it take pictures. If I set it to the manual setting, adjusting the focus manually does nothing whatsoever! Everything on the screen is still a blur no matter how much I turn the focus dial on the lense. I am using the lense that came with the camera.

### t7i will not auto focus or manual focus ... - Canon Community

However, Canon EOS auto-focus system needs a lens to speak to itself to work. The lens communicates its focal length and aperture values and the camera activates AF after confirming these. Some clever chaps cracked the code and embedded it in a tiny PIC chip and slapped those on Canon EF adapters for manual lenses.
