Mack E6 Engines For Sale | MyLittleSalesman.com

350 Mack n 10spd-DD Duplex instead of V-300 10spd-DD Duplex. engine swap easier the whole power plant conversion. I figure why do all of that major work to make both Faster and more Powerful when the truck really won't be leaving the property and won't really be towing any thing just be a winch truck.

350 Mack engine. Info | The Diesel Garage

Now that being said Mack's low HP engines actually had a rather high TQ out put as well, and with the "fire ring of steal" head design they can be lugged right down to 800rpm at wide open throttle :thumbsup Which is a death sentence for most big truck diesel's of the era maybe still is ? ?

Old Mechanical 350hp Mack engine | The Diesel Garage

Mack was the first truck manufacturer to produce its own diesel engines in 1938. At Adelman's, we are proud to carry many Mack engine models in stock and ready to go. Our Mack engines have been tested and are sold complete as manufactured for original application.

Mack | Diesel Rebuild Kits

Mack Trucks began producing the Maxidyne diesel engine and the Maxitorque transmission in 1966 to meet the demands of modern long-haul driving and to provide a more economical performance. Mack was struggling in 1966 and had severe cash-flow problems, but the truck maker decided to gamble on the Maxidyne as a means to ...

Mack Maxidyne Engine History | It Still Runs

My opinion was that the old E6 / E7 Mechanical 300s were just a very solid engine used for the job they did. they were not a powerhouse for over the road use but the little 676 cube 6cyl would hold its own against engines of 855 cube inch. A 300 mack would run with a 350 cummins. A 350 mack would run with a 400 cummins.

Mack E6, E7 vs their competition - Antique and Classic ...

The history of the engine is steeped in technology, tradition and good old American gumption one would expect from Mack. The e7 mack engine was first conceptualized in 1988 by the Mack Corporation engineers and introduced in 1989. The Mack E7 Engine replaced the longstanding Mack e6 model and was produced for over 20 years.

Mack E-7 History and Technical Information - Capital Reman ...

Too make things very simple,the biggest difference between the early Maxidyne 300,300+,and early 350 and the E6 engines was the aftercooling,the early ones used the side mounted aftercooler and a tip turbine fan,E6's were air to air mounted in front of radiator.I believe your 2nd pic is a 678 (early 350),not an E6.
