Complete Engines for Oldsmobile Cutlass for sale | eBay

Displacements vary from 215 cu in (3.5 L) (for the division's unique all-aluminum early 1960s engine) to 455 cu in (7.5 L) for its last big block in 1976. All are naturally aspirated OHV pushrod engines, except for an optional turbocharged version of the short-lived 215 used in the 1962-63 Oldsmobile Cutlass.

Buick V8 engine - Wikipedia

Enter Buick's all-aluminum, 215-cubic-inch V-8. Spread between Buick and Olds over three years, and just two years in the Tempest, GM built nearly a million engines before the design was quietly laid to rest. Casting issues meant a high scrappage rate, which meant reduced profitability on a car that was already squeezing the General's pockets.

Our Engines | Mondello Performance - Classic American ...

the engine was originally built many years ago to power a racing hydroplane boat (for which the 215 engine was a popular mill). The engine was apparently built, run on a test stand or a dyno only once for a short period of time, never installed into the hydroplane, and stored. Eventually the boat and

Oldsmobile "215" Stroker Motor (289 cid), by Kurt Schley

The Buick/Olds/Rover 215 cubic-inch (3.5 liters) aluminum V8 was originally announced in 1960 as a potential lightweight economy engine destined for General Motors new line of compacts: Buick Skylark, Olds Cutlass and Pontiac Tempest. First appearing in the 1961 model year, production ended in 1963 after over 3/4 million engines were produced.
